

NEWS BLOG ALERT:

Presidential Candidate Trump

targeted again for assassination !!

Direct comments to: bwatsoncgim@gmail.com

Just yesterday, on September 15th, 2024, a few months from the assassination attempt in Butler P.A., Former President Trump was *targeted again for assassination*. Shots rang out on the golf course in Florida, where Candidate Trump was playing a round of golf.

Apparently, a Mr. Ryan Wesley Routh, 58 years old, originally from North Carolina, but presently living in Hawaii, is currently an active American mercenary who is committed to fighting with the Ukrainian army's resistance to Russia's invasion. In an interview conducted in 2022 for Newsweek, we gain some insight by his admission he was involved in some combat and recruiting soldiers to help with the Ukrainian resistance against Russia.

In this interview he mentions how disappointed he is that more people are not motivated to help Ukraine with their struggle against the Russians. He is aggressively compelled to help Ukraine in its war and is extremely frustrated more people are not recognizing what he believes to be Russian expansionism.

With the knowledge of Candidate *Trump's "policy position" of peace* for the area, Routh, now suspected of attempting to assassinate Candidate Trump, was concerned if Trump wins the election, the possibility of a peace accord may be achieved—which is something he does not want to see happen. Mr. Routh firmly believes what is happening in Ukraine is a war against evil. For him it's obviously black and white—democracy is at stake—and Russia is threatening to destroy that democracy!

In his mind, there is no question about what needs to be done—*Russia needs to be stopped*—he admits, this to be the most important thing in the world. He cannot understand why more people are not responding to volunteer to fight and support the Ukrainians!

The interview link below will help you understand where his mind is and why he may have been motivated to attempt to take former President Trump out. It becomes apparent that because his passion is so great and is not shared by thousands of others; he is enormously frustrated and disappointed over this lack of people, in his opinion, just selfishly going about their lives, rather than being compelled to help Ukraine fight Russia.

This is quite an interesting interview and may provide some understanding as to why he thought assassinating Former President Trump was necessary for accomplishing his mission to stop Russia's advances into Ukraine. However, it appears to be clear, Mr. Routh does not want peace in that *theater of war—instead, he wants a world war!*
