

ISLAM IS ON THE RISE IN THE USA

BLOG #42

By: Bill Watson

A potential existential threat is emerging within the United States, *and it's no secret*. It has been growing over the last few decades, but has accelerated exponentially over the last decade. It is the *rise of Islam and the proliferation of the Muslim population in multiple American cities*.

Perhaps because this segment of the United States population has been increasing incrementally, that's blinding many from noticing Islam's growth. Maybe it's due to American citizens' tolerance or their naivety in failing to recognize the danger this "*political religion*" poses. Or, it's simply out of respect to the US Constitution, which protects freedom of religion, that restrains the American public and law enforcement from restricting the increase of Islamic laws and justice being conducted inside the United States. It's hard to say, but no matter what, the reality is: *Islam is on the rise and gaining influence and control in America!*

As examples of this, there are now substantially populated communities in many states and cities across the United States. There is a massive demographic shift in the Muslim population spreading across the nation, combined with the construction of hundreds of mosques. However, what makes this a *point of concern and contention* is their refusal to assimilate. Actually, there are major debates and court battles over culture, immigration, and the pressure to get Muslims to identify as Americans.

For instance, Texas is second only to California in the number of mosques. California has about 400 mosques, while Texas has about 350. However, Texas has accelerated in the construction of mosques, building about 48 over the last two years. Recently, Governor Abbott has given about \$13 million *in grants* to build more mosques. At this pace, with government subsidies, Texas will have the most mosques in the United States by the end of the decade.

There are over 100 mosques in the city of Austin, and in the city of Dallas, over 200. In the city of Irving, Texas there are two Sharia courts that prosecute cases. It's been said that hundreds of cases have been conducted through these courts. And we may ask, how can that be? Isn't that illegal for a culture of people to set up their own court system based on their own justice, as opposed to the laws that govern the United States? Yes, that is true.

However, many government leaders don't make a big deal of it because the verdicts don't apply outside the neighborhoods, and they really don't cause much disturbance. Yet conversely, for those Muslims living within the boundaries of these designated areas, it matters very much, especially as applied to the women! For them, Sharia law is very oppressive. They might as well be living in the 7th-century Middle East. Unfortunately, they don't know any better because they are not familiar with U.S. law—they don't know their rights.

But, on the other hand, many Muslims are running for public office within the U.S. government structure. Many have been elected to government positions. They have now risen to roles on city school Boards, in city government, as state legislators, or even in Federal leadership roles like Congress, the Senate, and law enforcement. In Dearborn, Michigan Abdullah Hammond is the Mayor. At present, 42 candidates across America, financed by known terrorist groups, have been elected to office. Keep in mind, a total of 76 candidates ran for office.

These 42 Muslims are now elected into some of the most influential offices of the United States. From the New York City Mayor, Virginia's executive branch, to some of our school Boards, and critical State legislative positions. They are spread over nine states: Michigan,

Ohio, Pennsylvania, New York, Virginia, New Jersey, Maryland, Washington, and North Caroline. All of these States have significant Muslim representation within their governments! Presently, there are six mayors, four State legislators, 20 City Councilors and Commissioners, 6 school Board members, 2 Judges, and 3 additional political positions. Each election cycle shows a growing Islamic presence within the halls of the United States government. It is no secret that the Muslim Brotherhood Plan For America is nothing more than a *covert operation* to destroy the United States by a “Grand Jihad.” This plan was outlined in a Muslim Brotherhood document in 1991. **The link below will provide some direct information** of what this plan is all about.

Apparently, Governor Abbot of Texas has recently recognized some of the dangers posed by two terrorists sponsoring Muslim organizations, those of C.A.I.R. and the Muslim Brotherhood. He has recently labeled them as terrorist organizations. However, regardless, the progression of Muslim infiltration into the United States’ roles of government is only increasing!

C.A.I.R. has big plans for its PAC fundraising operation. It is the Islamic financial weapon that is the engine behind the Muslim movement and fully intends to ramp up it’s political influence in the year 2026. They have plans and intentions to exceed the 42 new Muslim electors of 2025 in 2026. They are mobilizing Muslim candidates and mosques as political launch pads to build a campaign infrastructure for deeper infusion into the American political arena.

Brethren, this is a serious movement by this ***Political Religion***. Keep in mind, Islam is not friendly to our American values or structure. Islam is designed to dominate! The word itself *means to submit, surrender, and obedience to Sharia Law*, as outlined in the Qur’an and Hadith. The result of a nation dominated by Islam is a Theocracy, not a free Republic.

Below is a link to a post on a social media platform by Brigitte Gabriel, who is appealing for America to wake up! The stranger is rising above you (Duet. 28:43). And though she is soliciting support for her organization, regardless, what she has to say should alarm and resonate with every American citizen who values our American Heritage, history, and way of life. She points out that there are people who hate the United States of America and what it stands for, and much of the Muslim population is suspect due to their resistance to assimilation. That is what makes this movement so disturbing, and it's becoming far too apparent to ignore anymore!
